Tulips, Narcissi and Lilies

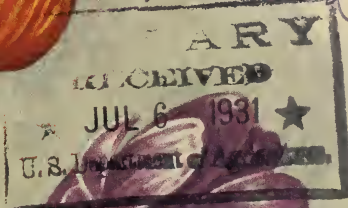

for the Connoisseur

AUG 10 1927

Import Division

Recorded

Direct Importations by
Mrs. C.R. Stewart Leckie
Sundial Dahlia Gardens
Greenwich, Conn.

W.R.B.

ALL of the bulbs listed, with but few exceptions may be seen during their blooming season, in the REFERENCE GARDEN, which is for your use. The Tulips are usually in bloom about the middle of May. The Lilies in June and July.

These bulbs are all imported to order only and no stock is available in the Fall. Kindly make your desires known as early as possible, preferably during the blooming season and not later than June 25th, for Autumn delivery. Your individual order is packed in Holland, being forwarded from here the day it is booked. The earliest customers get the first choice in Holland.

The price quotation may be halved or quartered.

Rate per thousand will be quoted on request.

I have access to the rarest and choicest varieties. When you have once known my stock you will return again—and then again.

MRS. C. R. STEWART LECKIE

This list of Narcissi is a representative collection of American grown stock which we are fortunate in obtaining since the embargo has prevented any further importation from Holland.

The price quotation may be halved or quartered.

GREENWICH, CONNECTICUT

L I L I U M

Lilies are most happy when their roots are in cool moist ground and their heads in the light or sun. Plant them among low-growing shrubs or perennials whose foliage will give them a ground cover, except the Candidum Lily which provides itself with foliage protection. Most of them require deep planting in a pocket of sand.

	Price per 100
Lilium Auratum (Gold-banded Lily of Japan), one of the most beautiful garden lilies. It is white, banded gold, spotted maroon, grows about 4 ft. high, blooming in July. Plant in full sun or partial shade, 10 in. deep	\$50.00
" Batemanniae , a rich glowing apricot. Likes a warm, sheltered location, in light rich soil, grows 3 ft. high, blooming in July. Plant 6 in. deep in full sun or partial shade	40.00
" Candidum (Madonna Lily of Northern France). Very effective planted among delphinium. Planting depth 6 in., blooms in June. They prefer late summer or early autumn planting	40.00
" Croceum (Alpine Lily), a stately lily blooming in June, orange spotted black plant 6 in. deep, height 2 ft.....	40.00
" Hansonii , a Japanese lily, golden yellow spotted purple, grows 4 to 5 ft. high, blooming in June, plant 10 in. deep. It thrives in heavy soil in full sun, often requiring two years to become established	10 bulbs 10.00
" Henryi (the orange speciosum), from China. A rich orange, banded green, grows 5 to 6 ft. high, blooming in July. Plant 10 in. deep in partial shade and rich loam. The bulbs have a remarkable habit of traveling under ground..10 bulbs	8.00
" Martagon (Turkscap Lily), a very old lily seen in many English gardens. One stalk bears numerous purple, wax-like flowers blooming in June. It prefers half shade and resents disturbance. Plant 4 in. deep	30.00
" Martagon album , a white form of the Turkscap lily	50.00
" Philippinense Formosanum , a Philippine lily. A distinct, pure white, trumpet shaped flower, of refined appearance and very fragrant. The foliage is long and grass like. It grows 3 to 4 ft. high, blooming in July. Plant 8 in. deep.....	40.00
" Pyrenaicum (yellow Turkscap lily), yellow, spotted greenish brown, grows about 2 ft. high, blooming in October. Plant 5 in. deep in sun or partial shade. A distinct variety	10 bulbs 6.00
" Regale , from Thibet, one of the finest lilies. The trumpet shaped flowers are white streaked brown, shaded pink on the outer petals. The inside is flushed yellow. Plant in rich soil about 9 in. deep, blooms in July.....10 bulbs	10.00

SUNDIAL DAHLIA GARDENS

	Price per 100
Lilium Speciosum Album Kraetzeri , snow white with a green stripe through the center of the petal, yellow anthers. Plant 10 in. deep in full sun. Height about 3 ft. Blooms in August-September.....	\$40.00
“ Speciosum Roseum , white suffused rose-pink spotted red, a green stripe at the base of the petal.....	35.00
“ Speciosum Rubrum , deep pink with a green stripe at the base, red anthers, will grow in partial shade	35.00
“ Speciosum Rubrum Melpomene , a deep crimson-purple edged white, base shaded green. Plant 10 in. deep in full sun. Blooms in Aug.-Sept. Height 4 ft.....	40.00
“ Szovitsianum (Colchicum), a Caucasian lily. One stalk bears numerous, fragrant, deep straw yellow flowers, spotted black. Plant 6 in. deep, preferably among low-growing shrubs. The first year they do not grow much above ground, but after they have become established they attain a height of 5 ft. or more. Blooms in June	10 bulbs 9.00
“ Testaceum (Nankeen Lily), the flowers are true nankeen yellow (dull apricot), with bright scarlet anthers. It is very effective combined with Madonna Lilies or Delphinium, blooming at the same season. Requires shallow planting but root protection from the sun.....each	2.50
“ Thunbergianum (Elegans), a dwarf Japanese lily, thrives in any soil preferably light soil. There are a number of named varieties. Plant 8 in. deep, grows about 2 ft. high, blooming in June-July.....	12.00
“ Tigrinum Splendens (the Tiger Lily), orange-red spotted purple, blooms in September. Plant 9 in. deep.....	12.00
“ Tigrinum pleno , a double form of the above	15.00
“ Umbellatum Grandiflorum , light orange-red	20.00
“ Umbellatum Golden Fleece , orange-yellow, new	10 bulbs 20.00
“ Umbellatum Splendidum , vermilion, new	10 bulbs 8.00

These umbellatum lilies bloom in June, growing about 2 ft. high. Planting depth 8 in. They are easy of cultivation, preferring a limestone soil.

The Lilies listed above are for autumn planting. Many of them come from a long distance which necessitates an early booking of orders. You are again urged to assemble your list during June. Ten may be ordered at the hundred rate.
